

JUAN DIEGO SAIRE

AI Product & Experience Engineer

Lima, Peru · jdsaire@pucp.edu.pe · linkedin.com/in/jdsaire · github.com/jdsaire · jdsaire.github.io/designops

PROFESSIONAL SUMMARY

Industrial Engineer and MBA (bilingual EN/ES). Bridging financial viability, operational rigor, and technology to test digital products before committing technical capital. Execute the end-to-end lifecycle of critical interfaces—research, experience design, AI-accelerated frontend development, and verification—turning high-complexity business requirements into deployed, tested software.

PROFESSIONAL EXPERIENCE

Lima Airport Partners | Processes and Innovation Specialist · *Callao, Peru* | May 2025 – Oct 2025

- **Designed** the interaction flow and comprehensive mockup of the TUUA payment platform for the new Jorge Chávez Airport terminal. Executed handoff to Airport IT for build and deployment; the platform currently collects fees from 130,000+ international transfer passengers per month.
- **Monitored** the performance of 12 innovation projects using Earned Value Management (EVM). Coordinated preventive and corrective actions alongside Product Owners to mitigate portfolio deviations.
- **Facilitated** 3 agile operational optimization workshops for 70 colleagues (rating: 3.88/4). Mapped workflows to identify bottlenecks and standardize improvements across key processes.

ESAN & UTEC | Part-Time Lecturer (UX Design & Calculus) · *Lima, Peru* | Mar 2018 – Feb 2024

- **Guided** 29 project teams through UX design and evaluation methodologies across 11 academic sections (UTEC).
- **Instructed** 1,200+ students in Calculus I, Creative Processes, and other coursework (ESAN).

INDEPENDENT PROJECTS

AccreditaPass | Press Accreditation App · *.NET 10 / Blazor Wasm / TypeScript*

- **Developed** and deployed a reactive web application featuring an optional ASP.NET Core Web API, a TypeScript interoperability layer, and real-time change notifications via SignalR/WebSockets.
- **Implemented** exact parity across 3 languages (ES/EN/PT) and audited build stability with 512 frontend tests and 33 backend tests (xUnit + bUnit).

Trust & Verify | Anti-Fraud Transaction Verification System · *React / TypeScript*

- **Built** a frontend application for retail fraud mitigation, integrating a randomized numeric keypad to prevent shoulder surfing, double-click prevention, and sensitive data protection.
- **Verified** the system through 45/45 automated tests across 6 fraud scenarios and 5 Continuous Integration (CI) checks.

DesignOps System | Design System of Tokens and Components · *HTML5 / CSS / Vanilla JS*

- **Structured** a native web architecture governed by design tokens (color, typography, spacing), 10 modular components, an i18n engine with 700+ keys, and WCAG AA accessibility compliance.

EDUCATION & CERTIFICATIONS

- **Tricontinental MBA** | CENTRUM PUCP · Merit order: 1 · Beta Gamma Sigma (Exchanges: Maastricht Univ. & Univ. of Victoria).
- **Bachelor in Industrial and Commercial Engineering** | Universidad ESAN.
- **MicroMasters in UX Design and Evaluation** | HEC Montréal.
- **Certifications**: Google AI Professional (2026) · Google UX Design (2026) · Microsoft Front-End Developer (2026).

TECHNICAL SKILLS

- **Frontend Engineering**: TypeScript · JavaScript · React · Blazor WebAssembly · ASP.NET Core · SignalR · WebSockets · HTML5/CSS3 · REST APIs · bUnit · xUnit · CI · Git/GitHub.
- **Applied AI**: Claude Code · Google AI Studio · Generative AI Workflows · Prompt Engineering · AI-Assisted Handoff.
- **Strategy & Product**: Design Systems (Tokens) · UX Research & Testing · WCAG AA Accessibility · Earned Value Management (EVM) · Process Optimization.
